

P-0116

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

- 1 | Hanford is already the most polluted place with radioactivity in the land. Why must we in this state also receive everybody else's radioactive waste?
- 2 | Second, why can't the USDOE get its act together and complete the cleanup at Hanford?

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

I understand there is an idiot who lives in Texas. He thinks he is ruling the world and he doesn't seem to care about spreading war, disease and atomic radiation. We've got a live one here, so let's send it to him and at least he will have something to show

- 1 | *for his state - TEXAS IS A MUCH BETTER PLACE FOR THIS STUFF*

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 For more than 20 years we have
been seeking a cleanup of radioactive
waste from the Hanford area - This waste
had the potential of polluting the
Columbia River & creating a crisis sit-
uation in the whole Pacific Northwest. Now
in a contradicting policy the Federal govt.
is attempting to store MORE nuclear waste
2 in the Hanford area. For the sake of human
& animal life in this area DON'T DO IT!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 What right does our government
have to condemn the Pacific Northwest
to Radioactivity for the ^{next} 10,000 years?
Our NW is one of the most livable
areas in the United States. Where will we
all go when it is decided that the
Columbia River and the whole NW is contaminated
and unlivable? In the meantime, how many of
us have to get cancer before the government
becomes alarmed?

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 The only sane and responsible action is to clean up Hanford NOW and to send no more chemical or radioactive waste to Hanford.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 Doesn't sound like this new EIS is going to do the job! I'm an American citizen, and my family has lived in the Pacific NW for four generations. Sending more ^{radioactive} waste to the ^{Hanford,} nation's most contaminated site - including the added danger of transporting it to the site, ~~dangerous~~ - just doesn't make sense. Don't do this! This needs to be re-planned and reworked. This land, this environment, this groundwater - it's in your power to help and sustain the healthful survival of all these things. Please do so.

Dear Mr. Collins,

- 1 Please do not allow 120,000
 truckloads of radio-active material
 to be dumped at Hanford. Clean up
 2 Hanford according to the tri-party
 agreement.

Do not permit our beautiful Pacific
 N.W. to become a national radio-active
 waste dump. Stop it now.

Sincerely,
 Anne M. Cipolla

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

I am a physician in Hood River, OR.
 This is a little town along Hwy 84,
 a stream from Hanford.

- 1 You are putting my community at
 risk for long term health problems
 from leakage at the site. You are
 2 also putting my community at risk if
 you proceed with plans of transport
 from accidents along the freeway.

Do not transport any more toxins
 to Hanford!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

19 May 2003

1 Please stop ~~any more~~ the Hanford National
Radioactive Waste Dump. It is already a contaminated
area.

2 This would increase danger to the Columbia
River and adjoining areas. It would
contaminate the food supply: Fish and
farms by causing groundwater and river water
toxicity. ^{It would cause} Also health risks for humans & animals.

3 Washington State produces much food for
the U.S. and world. The land and water must
be clean and not toxic for this production.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 Contamination of the ground
water & the Columbia River
has never been taken care
of - why add more? We
have greatly diminished
fish & bird populations in
that area. There are risks
to human health as well from
the river & the transport of
2 materials on public roads.

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

1 The EIS does not fully address the impact of additional wastes to be shipped to Hanford. The wastes currently buried in trenches is not completely characterized + its treatment, + the costs connected thereto, will be complicated + increased if more waste is accepted at the Hanford site.

JUDITH ALEXANDER 6831 19th NE Seattle, WA 98115-6941

Dear Mr. Collins,

May 15, 03

1 Please do not let Hanford become a National Radioactive Waste Dump. There is clearly too much danger of polluting the Columbia River. I understand
2 waste is going into unlined tanks/trenches. Please stop this practice. Cleanup efforts
3 must be begun now + be effective! Sincerely, Judith Alexander
